News Notes

After many years Raymond will again be the scene of squared circle activities, tonight, when Jimmie Mahon of Lethbridge, and Basil Daines of Calgary, contenders for the welterweight championship, will meet in a ten round bout. The semi-wind-up will be between Tommy Brooks and Byron Wall. Both of these boys are well known here and it should prove interesting. Five other preliminaries will make a good card. Those who have not seen the two kids, Laferty and Anderson, perform, will have an opportunity tonight.

St. Patrick's day next Thursday Mar. 17, will be celebrated at the Opera House by the two ward Relief Societies. The entertainment will commence at 7:30 p. m. and will continue until 12. It will include a program, refreshments and dance with the Imperial Orchestra furnishing the music. A charge of 25 cents will cover the entire evening. In the past the first part of the program has been free. But this year the plan of "pay as you enter" has been adopted. All are invited.

And now comes—"Grumpy"—the last home drama of the season. With Myron Holmes, Raymond's favorite actor, in the title role. In this part Myron has ample scope for his splendid talent, and it is a certainty that he will carry the play through in a style that will be appreciated by the public. The play is a mixture of mystery, comedy and society, with a gripping detective story running through it. March 19 is the date set for its production. The company is rehearsing daily and the members already have their lines fairly learned.

Read the Raymond Pharmacy's ad. on the back page of this issue.

Jacks Are Declared Champions

The following letter received by D. M. Powelson, manager of the Union Jacks, concedes Raymond the provincial championship. It is self explanatory.

Dear Sir:

After a careful consideration of all the factors the Athletic Executive has come to the conclusion that it will be impossible for the basketball team to enter the playoff series with the Union Jacks.

It is regrettable that the University team cannot complete the playoff. However the team is weakened through sickness, and financial difficulties such that it is advisable to default.

I am sure that the Union Jacks are worthy champions and will go far in the Dominion playdowns. Wishing your team every success, I am

Yours truly,
D. P. McDonald,
Sec'y Basketball Club,
University of Alberta

The Jacks will enter the western playoffs here on 28 and 29 against the winners of the Regina-Winnipeg playoff March 25 and 26. The winners here will play Vancouver at the coast on April 1 and 2. The Dominion championship will be played in the city winning the Western title.

News Notes

The Merc staff began last Tuesday to fill the shelves of the new store. This brings into operation perhaps the finest small-town store in the province.

Provincial wrestling elimination bouts will be held in Lethbridge next Wednesday. The finals for amateur provincial championships will be held in Magrath on March 25.

The Rex theatre will re-commence its six-per-week performances next Monday. To mark the event a diamond ring will be given away to the holder of the lucky ticket. The offering will be a rapid-fire story of auto racing, "California Straight Ahead". Mr. Brewerton's decision to re-open six nights per week will undoubtedly meet with popular approval.

Paul Redd has commenced the construction of a new modern residence. He has sold his old residence to D. C. Peterson.

The local Intermediates lost to Medicine Hat last Friday by a score of 18-12. This was a sudden death game, at the Hat, for the district finals. Saturday night the Hawkeyes defeated Sweet Grass in their own camp to the tune of 31-20.

During the month of February 169 Alberta farmers joined the Wheat Pool, bringing in a total of over 11,500 acres. The total membership is now 38,849.

Broomhalls, the British grain authority, cables that the Canadian Pool is selling wheat in Britain at a premium of from 14c to 15c above prices for Argentine and Australian wheat.

In his first interview following his arrival in Washington as Canadian ambassador to the United States, Vincent Massey told the newspaper representatives how the Canadian farmers are finding in co-operation a cure for their financial troubles. The formation of the Wheat Pool is a tremendous tribute to the resourcefulness and community spirit of the Canadian farmer, Mr. Massey said.

FOR SALE—Stock saddle in good condition.—Apply E. W. Shaffer, Raymond.

About 1000 people attended the free dance in the new Merc store last week. Everybody had a good time. In the afternoon a dance for children was given. All kiddies were handed a free bag of candy.

Mrs. C. Nilsson entertained the Kensington Club at her home Monday afternoon. A dainty luncheon was served on a table decorated with blue and gold. An enjoyable time was had by all.

TOWN OF RAYMOND

—NOTICE—

TAKE NOTICE that the Town of Raymond proposes to close the Street running east and west between Block A and block 26, Plan 2039I, Raymond.

Any person or persons having objections to the closing of the said street, and opening only a thirty (30) feet alley in its stead, shall file such objection with the Secretary-Treasurer on or before April 1st, 1927.

O. H. SNOW,
Secretary-Treasurer.

MAIL CONTRACT

SEALED tenders, addressed to the Postmaster General will be received until noon, on Friday, the 15th April, 1927, for the conveyance of His Majesty's Mails, on a proposed Contract for a period not exceeding four years twice daily on the route Raymond and Railway Station Can. Pac. from the 1st July next.

Printed notices containing further information as to the conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Office of Raymond, and at the office of the District Superintendent of Postal Service, Calgary, Alberta.

J. B. Corley,
District Superintendent of Postal Service
Calgary, Alberta, 2nd March, 1927.

Mrs. Wm. Isaacson, of Champion, spent a few days visit here with her parents, Mr. and Mrs. Fred Piepgrass.

Far North Wheat

Twenty-three farmers in the Fort Vermillion district, in the far north-western part of Alberta, 650 miles straight north of the international boundary, last year raised a total of 92,000 bushels of wheat and 13,000 bushels of oats. Their average for wheat was 25 1/2 bushels and for oats the average was 36 1/2 bushels per acre. They also had an average yield of barley of 30 bushels to the acre. This is the farthest north point in Alberta raising grain, and is some 200 miles farther north than the farm of Herman Trelle on which was raised the world's champion wheat and oats of 1926.

"I want to help" says Allen Boudria

Tells facts from own experience to help others. Almost wild with pain, weak and rundown, he won new health and strength through Tanlac

Allen Boudria, engineer, of 432 St. Patrick St., is one of Ottawa's best known citizens. "My purpose in telling the facts of my experience," he said, "is to help others who suffer as I did."

"For five years I was in misery. My whole system seemed out of gear, but my stomach troubled most. Even a drink of cold water would cause my stomach to bloat and swell abnormally. Gas would prevent me from sleeping at night so that I had to get up and walk the floor for hours. Violent stomach pains nearly drove me wild. I've seen times when I was doubled over, unable to straighten up."

"My friend M. Lapointe told me how Tanlac had helped him out of similar trouble, so I got some and used 9 bottles in all. It just made me over. I feel 30 years younger than I am, and weigh 214 lbs. My appetite and sleep are both fine. I eat what I like and sleep like a top. Tanlac and nothing else made this great change. I'm for Tanlac."

If overwork or neglect have worn you down get Tanlac, the great natural tonic made from roots, herbs and bark. Your druggist has it. Over 55 million bottles sold.

Is the Vote Worth Having?

To the people of Canada, and other countries enjoying the rights, privileges and liberties which responsible government confers upon them, fully appreciate the value of these possessions?

Recalling the long and bitter struggles that took place, first in Great Britain and later in Canada, as well as in practically all countries now under democratic institutions, for the right of the franchise, it would almost seem absurd to ask if people valued that which was so dearly won. Inquire of almost any Canadian citizen and the reply would undoubtedly be: "Of course, I value my rights of citizenship." And, however, speak louder than words, and how do thousands of Canadians make answer to this question when deeds rather than words are required?

The Chief Electoral Officer for Canada has recently prepared a statement of votes cast throughout the Dominion in the general election of last September, showing the total to be 3,273,002. The Dominion census of 1921 gave the population of Canada as 8,788,483. Using census numbers it may be assumed that the population was at least 9,000,000 in 1926. Of these 9,000,000 approximately one-half would be represented by those under 21 years of age or un-municipalized adults, leaving about 4,500,000 qualified voters. To be quite within the mark, say 4,250,000.

In other words, approximately one million citizens of Canada qualified to vote, or almost 25 per cent, at all votes, held their right to the franchise in such small esteem that they did not take the trouble to go to the polling booth in a general election to decide questions of national policy, leaving the personnel and policy of the National Government for the next five years.

The Canadian showing, while not one to which our people can point with pride, is decidedly better than the United States record, where in the elections of last November, when thirty-four State governments, thirty-five senators, the entire House of Representatives, nearly all the members of State legislatures, and thousands of municipal, county and other officials were elected, only one-third of the qualified voters went to the polls, the other two-thirds refusing to use their freedom and take upon their shoulders the duties and responsibilities of citizenship.

The people of Great Britain discharge the duties of citizenship better than elsewhere in the Empire, with the exception of Australia. But Australia votes under pressure and compulsion. Although the Commonwealth has equal adult suffrage, such a large proportion of its people refused to use the ballot that compulsory voting was established, and with good results so far as getting the people to the polls is concerned. In the last federal election in Australia and in a more recent national election, 90 per cent, of the total registered vote was polled.

Is it not, however, passing strange that men and women must be compelled under pain of a fine imposed for failure to vote, to discharge the most obligation of their citizenship?

As one public man, commenting on this amazing apathy on the part of a large section of the people, very truly says, no country can be well governed where only the professional political elements interest themselves in election. Unfortunately a great percentage of those who refuse to vote have the curious conceit that they are the superior class; that politics is something beneath them. Such people are, in fact, less worthy citizens than the professional ward workers in our large cities.

If Canadian citizenship is worth anything, it is worth at least the trouble involved in exercising day to day of going to the polls and exercising the franchise which such citizenship confers.

Nearly Hundred Years Old

Experiments Made in 1935 With Electrically Propelled Cars

Electric propulsion of cars dates as far back as 1827, when Thomas Davenport, of Vermont, and in 1838 Robert Davidson, of Scotland, both ran experimental cars by voltaic batteries carried on the car. It was not, however, until the dynamo electric machine was perfected, so as to reduce the cost of current, that any practical system was devised.

The Portsmouth and Glau's Causeway, England, electric tramway, in 1882, was the first line in the United Kingdom which took the current from a conductor.

The coldest time of the day is the hour just after sunrise, according to scientists. This is explained by the fact that when the sun strikes the earth it causes the evaporation of a chilling moisture.

A British army regiment recently returned from Constantinople to England, after being absent 18 years and having served in eight countries.

Incident Worth Mentioning

Union Jack Dropped From Laurence's Mainmast When Landed by Diver

The story of how the gold on the White Star liner *Laurentic*, sunk by the Germans in the war, was recovered by divers operating from the Admiralty steamer *Racer*, now about to be added, is one of the most thrilling in the history of sea salvage. One incident that was thought too trivial to be recorded at the time is worth mentioning now, for the touch of the sea tradition it brings into the story.

The *Laurentic* sailed from New York in January, 1917, her strong room filled with gold and silver worth about £25,000,000. She was struck by German torpedoes off Lough Swilly and sunk in 120 feet of water. After two years an effort was made to salvage, and then when a diver went down from the *Racer* he found, dropping from the *Laurentic's* mainmast, a faded flag with several rents in it—the Union Jack.

Queen Wears Rat Coat

Many persons have admired a brown coat which Queen Mary has been wearing this winter, and numerous references have been made to it in print as "the Queen's saddle" and so on. As a matter of fact it is made from the skins of rodents killed on the Royal estates and put together by a skillful furrier. Every public reference to its assumed value and the rarity of its skins is greeted with unrestrained amusement by the Royal household.

Mother: "That child doesn't get his temper from me."

Father: "No; none of yours is this abug."

Was Once Smugglers Haunt

But Now St. Helen's Is England's Most Moral Village

St. Helen's, Isle of Wight, is undoubtedly England's most moral village. So good and peace-loving are the inhabitants that the local police station has been closed.

A policeman from Seaview, a few miles away, cycles to the village every day as a matter of form. The time of his arrival is known to all. He is greeted with smiles. There is never anything serious for him to do.

Thirty years ago things were different. Strangers had to be careful if they visited this tiny hamlet after dark. The inhabitants, distrustful visitors, and were apt to show their dislike. A notorious gang of smugglers had their headquarters here, and quantities of rum and contraband goods passed into the island for transport to London.

Innocent little thatched cottages or the crypt of a neighboring church were used as hiding places by the smugglers. The police and the revenue men were never able.

RHEUMATIC VICTIMS

Can Find Relief Through Building Up the Blood

Pain is the symptom of rheumatism that every victim recognizes, and he generally attributes the trouble to cold, damp or changeable weather. But doctors know that thin blood is a marked characteristic of the trouble. Trying to cure rheumatism while the blood remains thin and poor, is an impossible task because there is nothing to build on. A tonic like Dr. Williams' Pink Pills that enriches the blood and frees it from poisonous impurities soon banishes rheumatism from the system. So long as the blood is maintained in a healthy condition the trouble will not return. This is not theory. It has been proved in hundreds of cases; here is one:—Mr. J. W. Rose, R.R. 2, Albany, N.Y., says:—"For some years I was a great sufferer from rheumatism and although I tried a great many remedies, I did not get any permanent relief until after I took Dr. Williams' Pink Pills. The trouble was located mostly in my shoulders, and at times was so bad that my right arm was almost useless. Of course I suffered much pain and great inconvenience. My attention was directed to Dr. Williams' Pink Pills through an advertisement in our newspaper, and I decided to try them. I took the pills according to directions with the result that the rheumatism has left me, and I never had a twinge of it since. It has made the use of any rheumatic sufferer my advice is try Dr. Williams' Pink Pills at once."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Money's Power in Russia

Only Those Who Are Rich Can Hope to Succeed

It is evident that the country has moved very far since the heroic days when money, banks and commerce were suppressed, and when a privately-owned shop or farm was considered as a crime against Communism. But it is even worse than that. It appears today that to be able to succeed in Russia, and to acquire power, it is necessary before everything to have money. At the last elections to the rural Soviets, out of 820,000 elected, 150,000 delegates did not belong to the Communist Party. Three-fourths of the presidents of the rural Soviets were landlords, or rich peasants, who have given up manual labor themselves and are content to make others work for them.

Tring which has been made too thin may be thickened by adding flour instead of more sugar. Very little is necessary.

Pains Across Kidneys

For Two Years

Unable to Work

"Gin Pills—Wonderful Remedy"

We receive thousands of letters yearly from grateful users of Gin Pills, who have been relieved of suffering from kidney and bladder trouble. When Nature fails to do her proper work of eliminating harmful waste through the kidneys, bladder and bowels, a remedy must be found. Many people have found Gin Pills to be this remedy. Among them, James Johnson of Bridgeburg, Ont. He writes:

"I was troubled with pains across the kidneys for two years. I was unable to do any work. I read about Gin Pills and got a box right away from my druggist. My sincere thanks are due you for your wonderful remedy, which has done so much for me."

Neglect of kidney trouble spells disaster. Lumbago, Rheumatism and Sciatica as well as bladder and urinary troubles follow. Upon the first warning get a box of Gin Pills, 50c at all druggists. National Drug & Chemical Co. of Canada, Limited, Toronto, Canada. 127

The Baby's Cold

Western Canadian Wheat

Saskatchewan University Investigating Protein Quality and Quantity in Wheat

"Field husbandry on trial at the bar of the world's market places," was the subject of Dean Rutherford's address in which he spoke of the first shipment of Western Canada wheat from the Old Kildonan settlement to Manitoba in 1857. He recalled that in 1881 Dr. Angus McKay had a bumper crop but lost it at the beginning of September badly-froze, the grain which was ground into flour at a specially erected mill. A carload of flour was shipped to Winnipeg, Toronto and Montreal and when the returns were received there was a bill of \$8 still to pay on the shipment in excess of the returns.

"What does the Old Country market want in wheat from Western Canada?" asked Dean Rutherford, in answering his own question he pointed out that Western Canadian wheat was spring wheat and should be hard, vitreous, glutinous wheat to meet the requirements of the Old Country market.

"Amateur wheat breeders put new varieties on the market before they are properly tried out in the matter of strength and color," he declared, "and if you put a dark wheat on the markets of the world you are going to lower the color standard."

Dean Rutherford said it was expected that the work started at the University of Saskatchewan in 1926 with a view to finding out the factors influencing the storage of protein quantity and quality in wheat would be enlarged in the near future and correlated with field husbandry work.

In the meantime the field husbandry association could exert its influence in respect to the purification of seed sown in the fields of Saskatchewan and get a large number of farmers interested in the purity of seed.

Through the Wheat Pool organization with its 80,000 members and through other farm organizations the field husbandry association could get information out quickly to the people on the farms.

Babies Cry For "Castoria"

Prepared Especially for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups. Contains no narcotics. Proven directions are on each package. Physicists everywhere recommend it.

The genuine bears signature of *Chas. H. Fletcher.*

Build Fighting Planes

Canada May Construct From Four to Six for National Defence

Addressing militia officers at Ottawa, Major-General J. H. MacBrien, chief of staff, intimated that if the proposed national defence estimates, passed the House of Commons, Canada intended to construct a fleet of from four to six up-to-date fighting airplanes equal if not superior to the United States squadrons which recently visited Ottawa. He also stated that Royal Canadian Air Force officers are actually working with Imperial authorities on plans of the proposed mooring mast to be erected in Canada as part of an empire airship route.

A huge snake known as a sunni, 24 feet long and weighing 352 pounds was captured recently in Central Brazil. This snake is said to eat but four times a year.

If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

Addressing a political gathering, a speaker gave his hearers a touch of the pathetic. "I miss," he said, brushing away a not unmanly tear, "I miss many old faces I used to shake hands with."

Is An Expert "Lineman"

Woman Manager of Texas Telephone Trouble

Trouble on the line is no trouble at all for Mrs. J. N. Daniel, who at 73 is one of the expert telephone "linemen" in Texas.

Mrs. Daniel is manager of the Georgetown Independent Telephone Company, the largest managed by a woman, but she does not confine her activities to sitting in a swivel chair and appealing managerial. She fills every position from president of the company to trouble maker out along the far flung wires over which she presides.

It is as the nemesis of trouble that this vigorous gray-haired woman perhaps has developed her greatest efficiency. She hops on the company's repair truck, dashes out to run down the hook in the wire, and points out to her repairman what to do to get the wires humming again. She does everything but climb poles, a feat she says she abandoned after she was 60.

Mrs. Daniel took over the telephone company at the death of her husband 16 years ago. Since then she has more than tripled the business. She trained herself at 60 by studying electrical and telephone engineering and then took a course in commercial law.

INDIGESTION, GAS,

UPSET STOMACH

Instantly! "Pape's Diapiesin"

Corrects Stomach so Meals Digest

The moment you eat a tablet of "Pape's Diapiesin" your indigestion is gone. No more distress from a sour, acid, upset stomach. No flatulence, heartburn, palpitation, or misery making gases. Correct your digestion for a few cents. Each package guaranteed by druggist to overcome stomach trouble.

Plan Dominion Aerial League

Winnipeg Citizens Form Committee for Furthering Aviation in Manitoba

The mission of Sir Alan Cobham, famous British aviator, to Winnipeg has already borne definite results. Following a meeting at which Sir Alan related his experiences in flying from Great Britain to Australia and back, a committee of leading Winnipeg citizens was formed for the furtherance of commercial and civil aviation in Manitoba.

The committee will investigate the possibilities of aviation in the province and cooperate with other provincial bodies that are working for the organization of a Dominion-wide aerial league.

In urging the formation of light plane clubs, Sir Alan offered to supply any needed statistics relative to aviation.

Did Not Prove Handicap

British Postmaster-General in Gladstone's Time Was Totally Blind

In spite of total blindness caused by a gun accident, Henry Fawcett rose to high positions in British public life. He was born in September 1832. At the age of 22 he entered the House of Commons where his ability and devotion to worthy causes soon made him a prominent and influential member. In 1880 he became Postmaster-General in the Government of Mr. Gladstone, and during his term of office he brought about many improvements in the postal service. He died in 1881.

One of the most effective remedies on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

The ability to speak several languages is valuable, but the ability to keep your mouth shut in one language is priceless.

A Prime Dressing for Wounds. — In some factories and workshops carbolic acid is kept for use in sterilizing wounds and cuts sustained by the workmen. For better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not sear the skin or burn the flesh.

Because labor is cheap, Indians in Bolivia, South America, are hosts of Lurden.

All fighters are true but none of them use as much red tape as light commissioners.

Keep Minard's Liniment in the stable.

THE OLD RELIABLE

and for cleaning and DISINFECTING

Gillette's Lye Protects Your Health and Saves Your Money

Price of Matches

Reduction in Excise Tax May Lower Price Perceptibly

The household or large box of 400 matches will elosely be affected by the reduction in the excise tax on matches announced by Finance Minister Robt in the Budget speech. It will mean a reduction of one cent in the retail price of the large box, according to a large match producing factory here. The present excise duty on the large sized box of matches is four cents, so that the 25 per cent. tariff reduction just announced will make the excise tax three cents on this box after July 1. It is most unlikely that the retail price of the small box of matches will in any way be affected by the reduction.

Easier to Substitute

Editor (dictating a letter)—"My dear Mr. Schenkeldhausenheimer—"

Miss Keytrap—"How do you spell that name?"

Editor—"S-c-h-e-i-m, by the way, suppose you begin the letter "My dear Sir, and save the wear and tear on the machine."

You can rely on SHILOH FOR COUGHS

A BROKEN DOWN SYSTEM. This is a condition for doctors to which doctors give many names, but which few of them really understand. It is simply weakness, breakdown, as it were, of the vital forces that sustain the system. Somewhere or other has been caused by one or more of the following:—

1. The more prominent being: sleeplessness, sense of prostration or weariness, depression of spirits and want of energy for all the ordinary avocations. Now, what is absolutely essential in all such cases is increased vitality—vigour, vital strength and energy to throw off those morbid feelings, and as night succeeds the day this may be more certainly secured by a course of THE NEW FRENCH REMEDY, THERAPION NO. 3.

that by any other known combination. Sincerely as it is taken in accordance with the directions accompanying it, with the latest and best understood THE EXPIRING LAMP OF LIFE LIGHTED UP AFRESH, and a new existence imparted in place of what had so lately seemed worn out, and past and useless. This wonderful medicine is suitable for all ages, constitutions and conditions, in either sex; and it is difficult to imagine a disease or derangement whose more fatal feature is weakness, that will not be speedily and permanently overcome by this remedial essence, which is destined to reach the dying, even one that has preceded it for this and so on. It is a most wonderful of all medicines.

Write for literature, samples, etc. to Ramsey Co., Ltd., 271 Bank St., Ottawa.

Some Encouraging Signs Show Better Planning of Towns is Now Taking Hold in Canada

Town planning is making slow but certain progress in Canada, according to the report of the committee on town planning of the Dominion Land Surveyors' Association, compiled by H. H. Bartley, D.L.S.

The committee finds, in reviewing the progress of the year in this world-wide movement, that there are some encouraging signs that better planning of towns and cities is catching on in the Dominion. From east to west it is found that in the larger cities there is an awakening consciousness as to the benefits to be derived. In Montreal the movement is voluntary, an organization having been formed for the development of a plan which can hardly fail to result in the operation of an official city plan sponsored and financed by the city.

In Vancouver action followed the passing of a provincial Town Planning Act. The city promptly appointed a town planning commission and consultant and staff to create a comprehensive plan for the city and environs at a cost of \$10,000, spread over three years. Surrounding municipalities probably will agree on a regional plan.

Industrial companies who are establishing great enterprises in Canada are keenly alive to the advantages of correct planning of their town sites, Mr. Bartley reported. For instance, at Arvida, Que., the Aluminum Company of Canada is laying out the nucleus of a city for its employees on former raw lands comprising some 600 acres. They are proceeding on carefully prepared plans designed for an ultimate population of 40,000. Construction of 270 houses was included in last year's program, and plans include development of roads, sanitary and fire protection and landscape treatment.

In Western Canada the town planning movement is gathering momentum. Certain of the municipalities around Winnipeg are taking steps toward the formation of town plans under Manitoba laws, and the City of Edmonton has announced its intention of proceeding similarly. Kitchener, Victoria and Ottawa are other Canadian cities in which definite progress has been made.

The report concludes: "It is suggested that the dominant course for the rapid advancement of town planning in Canada is a matter of education and persuasion and that the necessary enactments will inevitably follow. If in the development of our young Canadian cities and towns we can, by wise planning, avoid the creation of slum and tenement districts, we will be in a far more advanced position than could be secured by any frantic efforts in the future to develop lavish civic monuments in an attempt to conceal the squalor of the neglected districts."

The Village Blacksmith

Business Was Never Better in This Trade Than It Is Today

Those who lament the passing of the village blacksmith with his muscled arms and classical anvil, will dry their tears when they learn that the business of the village smithy was never better than it is today.

This fact was brought out at the annual convention of the Manitoba Association of Blacksmiths, Horse-shoers and Woodworkers, held in Winnipeg.

Although the old grey mare is giving way to the new "flu flize", the blacksmith still finds his brow damp with honest perspiration. Instead of fitting hobnail with a new set of iron shoes, he is called upon to fix a broken gadget on the tractor and other mechanical repairs.

Business is good in the blacksmith trade, but is difficult to get the rising generation to take it up. Blacksmiths immigrating from Europe must be relied upon to keep the business going in the next generation, it was said.

Jenn—"What are you so furious about?"

Mac—"Daisy called me an old cat!"

Jenn—"Why, you're not so old."

Dad—"My dear girl, has he given you any encouragement?"

Dot—"Well, last night he asked if you and mother were pleasant people to live with."

The word "highway" is said to come from the name of the old Roman road which was elevated as much as four feet above the surface to permit good drainage.

Danzig Families for West

Several Hundred to be Brought to Canada is Report

According to reports, arrangements have been completed for the bringing out to the west of several hundred families from the Danzig Free State. This information is given by Rev. E. Schmol, Winnipeg, manager of the Lutheran Immigration Board, who has returned from a trip to Europe. While there he visited Germany where he interviewed the government officials of that country on emigration. As a result of his interview he expects heavier immigration from that country, this year.

The Lutheran Immigration Board connections have been enlarged in Europe, and 10,000 agricultural settlers will be brought to Canada through activities of that organization, according to Mr. Schmol.

A New Bloomer Dress

Charmingly simple is the attractive bloomer dress pictured here and a style very easily fashioned. The front and back are gathered to a fitted yoke opening on the shoulders. The bloomers have elastic run through a top casing and at the lower edge of the legs. No. 1492 is in sizes 2, 4, 6 and 8 years. Size 1 year requires 2 1/2 yards 36-inch material, or 1 1/2 yards 54 inch, and 3/4 yard 36-inch contrasting for yoke and belt. Price 20 cents the copy.

Seemed Good Suggestion

Fair buyer in store: I want a present for a gentleman; will you assist me in my choice?

Polite salesman:—Certainly, madam. Would a tie be suitable?

Fair buyer:—No. He has a beard.

Salesman:—How about a fancy waistcoat.

Fair buyer:—No. He has a very long beard.

Salesman:—Then how about a pair of carpet slippers?

Fruits and vegetables can feel pain, says a scientist.

But the grapefruit is the only one that strikes back!

Men sometimes make money, but money never makes men.

Describes Edison's Work

J. W. Lieb Tells Electric Light Body of Development of Lamp

John W. Lieb, vice-president and general manager of the New York Edison Company, told how Thomas A. Edison developed a commercially practicable incandescent lamp, at the dinner of the engineering section of the National Electric Light Association. He said that before Edison began research work on the lamp he devoted six or eight months' study to the gas industry as providing the closest parallel; that underground distribution similar to that used by gas companies was essential. He then calculated that an electric light to be successful must have a resistance of at least 100 ohms, which was far greater than that aimed at by other experimenters, and on that basis began his search for a filament which would carry a tension of 100 volts.

A revolution in the electric industry which will be comparable to the revolution caused by the use of alternating current was predicted by Dr. C. E. Hirschfeld of the Detroit Edison Company. He said he did not know what form the revolution would take, but was satisfied that research work now going on would bring it about in the near future.

Dentist Advises Use of Milk

Says Average Modern Diet Lacking in Calcium and Phosphorus

At the Board of Trade meeting here, Dr. Wallace Secombe, Dean of the Faculty of Dentistry of the University of Toronto, took issue with the suggestion of Dr. J. Shu Wallace, of England, who has been lecturing throughout Canada that milk should not be continued in the diet beyond two years of age, after the deciduous teeth have erupted. Dean Secombe stated that the average modern diet is generally lacking in the essential elements of calcium and phosphorus and urged that milk be continued in the diet of children and also of adults because it contains in average serving more of the vital elements than are contained in any other food.

It was also stated by Dr. Secombe that the teeth of the nation were suffering by over-indulgence in sweets and soft foods. Milk is an excellent food but should not be used for soaking other articles of diet. The food should be so prepared that thorough mastication will be necessary, and this will assist materially in maintaining dental health.

The World's Prize Optimist

The world's leading feminine optimist lives in Crockett, Texas. She is Mrs. M. A. Woolley. Mrs. Woolley has written to the editor of an Atlanta paper asking him to help her find her first husband who she hasn't heard from since the Civil war. She said he fought in the army under General Wheeler and enlisted in Georgia. The first husband's name was M. C. A. Smith.

A woman writer advises girls never to marry men who talk loud. This advice is certainly sound.

Daniel is the only man we ever heard of who wasn't spoiled by being lionized.

Champion Jersey of the World

A Jersey calf, drawn in a Government calf club at Armstrong, B.C., has turned out to be the champion Jersey cow of the world, holding the record for milk and butter production over a period of ten months.

Pretoria Oxford Janet is the name of this distinguished champion and is owned by Harry Whitaker of Armstrong, B.C. The cow is the only Jersey in the world to give over 1,500 pounds of butter during a ten months test. She also yielded during the same period 14,555 pounds of the purest milk.

The champion is seen looking contentedly from a Canadian Pacific Express car on her arrival at Vancouver recently to be exhibited at the annual livestock exhibition at Spence's.

Should Be Compelled

To Learn English

Immigrants Who Understand Language Make Better Citizens

An Ontario Magistrate recently made the suggestion that foreigners who could not speak English after so many years' residence in Canada should be given some form of punishment.

Rather drastic. But something should be done about it, and they seem to have the right method in Australia.

Every immigrant has to pass a language test. The failure to pass is "No admittance."

If immigrants are never going to learn any language but their own, they should stay in their own land. Unless they get a working knowledge of the speech of the country they have come to they will never become citizens of their adopted land. It seems that they will herd together, forming "Little Italys," "Little Germanys," or whatever country they come from, continuing the habits of their native soil, making no attempt to Canadianize themselves so long as they rub along and make a living comfortably.

Of course in time their children will attend Canadian schools and speak the English language, but they will still only be half Canadianized because the influence and the common tongue of the home will remain what it was in the land the family came from. It will take generations for immigrants of this type to become Canadians, whereas the process of making over should commence from the day they arrive.

There should be a check-up on adult immigrants and everyone of them made to attend special classes for foreigners, so that they cannot make the excuse that they do not know the language because there were no facilities to teach them.

Advantages of the Country

Subjects of Interest More Varied Than Those in City

It is a matter of common observation that countrybred people are not more dulled than townfolk. Rather have they stores of wisdom which the feverish distractions of town life do not breed.

For the purpose of education the country provides for more favorable material in some ways than the town. One does not need to be a Wordsworth or a Jefferies to find inexhaustible subjects of interest and inquiry in the earth and every common life.

The boy who lives amid meadows, mountains, woods and streams is at an advantage as compared with his fellow whose horizon is bounded by bricks and mortar, the endless monotony of the streets and the endless bustle of the factory and workshop.

Ted—"Here comes Dave! He won a golf cup and he'll talk us to death."

Jerry—"Hurray! And here comes my cousin. He just bought a new radio. Let's introduce them to each other and leave them to their fate."

Though a man conquer a thousand men in battle, a greater conqueror still is he who conquers himself.

Question of National Defence Is Engaging Serious Attention Of Authorities in Canada

For Fattening Cattle

Rape, Kale and Cabbage Make Excellent Pasture for Sheep, Swine and Cattle

Rape, kale and some varieties of cabbage make excellent pasture for sheep, swine and cattle, being particularly valuable for young cattle and fattening steers. Grown in poultry runs, they make a satisfactory free-range food for most kinds of poultry. They occupy a permanent place in the regular farm rotation in many European countries. They are, however, not yet utilized in Canada to the extent that their value warrants and in order to bring them to the attention of farmers the Dominion Experimental Farms Branch has recently issued a pamphlet entitled "Fleshy Annual Pastures" giving information concerning these crops in the hope of bringing about their more general use.

These fleshy annual pastures thrive under a great variety of climate and soil conditions, and they yield surprisingly well even where the summer rainfall is light. New land may be used to advantage for growing them, and on much soils they are frequently more profitable than any other forage crop. The pamphlet, which may be obtained from the Publications Branch, Department of Agriculture, Ottawa, gives general information on the cultivation of these crops and the uses to which they may be put.

Account Book for Farmers

Department of Agriculture Prepares One for General Use

Frequent reference has been made in recent issues of the farm press to the desirability of making an inventory or taking stock of farm supplies, implements, live stock, etc., during the month of March. The suggestion is a good one, and the Dominion Experimental Farms Branch has published an extremely simple Farmer's Account Book in which are several pages especially designed to assist the farmer in making such an inventory. To "keep accounts" in this book requires no special knowledge of accounting, simply the ability to write and add, and a record of transactions can often be made in less than one hour a week. The book may be obtained from the Publications Branch of the Department of Agriculture, Ottawa, at a nominal charge of ten cents. No postage need be placed on letters of application.

Britishers Coming to Canada

This Country Now More in the Public Eye Than Any of the Other Dominions

"Western Canada begins to see a tremendous influx of immigrants from the old country, this year, and it is going to start very early," Col. A. H. Brose Smith, Winnipeg, declared on his return from a two months' visit to the British Isles. "The ships of immigrants are being loaded with people inquiring for passages, he said, adding that Canada was more in the public eye at the present time than any of the other dominions or other countries to which the Britisher usually emigrated."

Plans South Pole Flight

Commander Byrd is Willing to Make Hazardous Trip

An airplane dash over the South Pole, regarded as far more difficult than his flight over the North Pole, is being planned by Commander Richard Byrd, he told the American Legion Posts at Kansas City.

Byrd said plans for the expedition would require two years. He outlined the manifold hazards of the South Pole region, an area twice the size of the United States.

The base would be established 1,000 miles from the objective, he said.

Sharks May Furnish Leather

Sharks may some day rival cattle as leather producers of the world, in the belief of Marlin M. Chelquist, representative of a Seattle leather company. After spending 18 months in Japan instructing Japanese fishermen in the value of "sea steers" hides he predicts that sharks, once used only for food in the Orient, soon will be a substantial source of raw leather.

As a farmer was leaving for the city, he asked his wife if there was anything she wanted, and she replied: "You might drop into one of those stores and get a jar of that 'traffic jam' I see advertised."

Since the definite declaration by the Imperial Conference of the Independent status of the Dominions there has been a good deal of discussion in Canada of the question of national defence. Reports from Ottawa intimate that the principal feature of the estimates for the Department of Defence will be an increase in the appropriation for the air force with the object of building up that branch.

The Ottawa Citizen thinks that the Royal Canadian Naval Air Service should be revived. It speaks of the work which it did during the war in protecting Canada's sea lines of communication and it says:

"Canada should have a minimum number of cruisers, mine-layers, destroyers and auxiliary ships for naval service; but most effective, without great expense, would be the revival of the Royal Canadian Naval Air Service. An efficient air service could be hastily conjured up overnight. The whole success of flying depends upon preliminary organization."

"The development of civil aviation will furnish the very best kind of reserve for national defence. In the development of an air force reserve, however, one of the first steps should be to take the administration of civil aviation out of military control. Civil government flying and commercial aviation should be administered as are merchant shipping and railways, by civilian officials."

"In Great Britain, where there is a separate Air Ministry, the department of civil aviation is administered quite apart from the Royal Air Force. Although, of course, there is the closest co-operation in building up an air force reserve. It would be an economy for Canada to bring civil aviation, shipping, radio telegraphy, railways and canals under one administration, in a Department of Communications."

The Citizen, whose first Major General McFadden, who has just returned from a visit to the United States, would be a good man to put in charge of the development of civil aviation. He has qualified as an aviator—Manitoba Free Press.

Round Up of Wild Horses

Campaign in British Columbia to Make a Clean-Up of Roving Bands

Hundreds of wild horses that have been roving the brush areas and sage brush country and the Cariboo mountains in British Columbia, are to be rounded up and slaughtered by bands licensed by the Provincial government.

The campaign has been ordered on a voluntary basis for several years, but this year the government hopes to make a "clean up" of the roving bands that have been causing crop and sheep pasture and causing depredations among domesticated stock.

It is estimated that there are about 10,000 wild horses in British Columbia, most of them descendants of the stock brought into the Cariboo gold country by the miners of half a century ago.

According to officials of the Government who are planning the round up, there is no cause for complaint against the policy of the government. The majority of the horses are not of the high spirited, graceful running type, but headstrong, half-crippled animals whose killing would be an act of kindness.

It has not been decided what will be done with the carcasses, but it is probable they will be shipped across the United States border to a plant where such material is being used for the manufacture of fertilizer.

An Extraordinary Forest

What is probably the most extraordinary forest in the world occupies a tableland some six miles in width, near the West Coast of Africa. The trees only reach a height of one foot, although their trunks are as much as four feet in diameter. No trees bear more than two leaves, and the latter are often six feet long. Popular Science.

Swedish-Belgian "No War" Pact

The Royal Swedish-Belgian mutual alliance between Princess Ast and Crown Prince Leopold of last fall has been followed by an agreement between the two countries never to go to war over any subject, even those usually excluded, "vital interests" and "national honor."

Wife John, will you love me when my hair is gray?

Hubby—Why not? I've loved you through three shades of hair already.

WORLD HAPPENINGS BRIEFLY TOLD

A sum of \$1,000, lost by a party of settlers in a train near Vancouver, B.C., was recovered by a track walker and returned to the owners.

The Canadian legation invited its first ship of building Feb. 22, in honor of Washington's birthday. Its flag on this occasion will be the Union Jack.

Queen's University announce a new fellowship for the encouragement of research in Canadian history. Sir James Aikens, of Winnipeg, contributed \$5,000 toward the endowment fund, making the new fellowship possible.

Correct attire is required of street car passengers at Rio de Janeiro and the rule is rigidly enforced. Men must wear a collar and tie, and on the first class cars, a coat. A conductor recently stabbed a man who insisted on riding in violation of the collar and tie order.

King George has appointed Lady Maudie Home a dame commander of the Order of the British Empire. The appointment is in recognition of her recent voyage to India, which she made by air, accompanying her husband, Sir Samuel Home, British air attaché.

The Excellency, the Governor-General of Canada, made his debut as a speaker over the radio when he spoke at a luncheon given at Ottawa under the auspices of the Ottawa council, Boy Scout Association. The speech was broadcast through radio station CNR.

The extent of "Red" influence in the Australian Labor Party has been disclosed in a sensational document issued from the Labor headquarters in Sydney, charging Minister A. C. Willis and other prominent Labor men with plotting during the last four years on behalf of the Communists.

The United States again has taken the lead over the rest of the world in the export trade to Russia, says a Moscow dispatch. For the first quarter of the current operating year America sent \$17,000,000 worth of manufactured goods to Russia, which is about \$1,000,000 greater than for the same period last year. Germany was a close second, England third, and Poland fourth.

American radio programs are to become a regular weekly feature of British broadcasting. Every Tuesday, British broadcasting engineers will test reception from the United States, and, when-ever it is sufficiently good, they will inform London, T.O. The London program will then be immediately switched off and America will be relayed to all listeners, even those who own crystal sets.

Flag Made of Feathers

Made completely of feathers, a flag of parade, an enormous Italian flag has been received by Signor Mussolini from a missionary who left Rome three years ago for British New Guinea. At the time the missionary went away Mussolini made him a present of a bicycle, a saddle, and an Italian flag.

Jerry—"I was told when I was young that I'd become feeble-minded if I didn't stop smoking."

Joan—"Oh, why didn't you stop?"

The Doctor—"Now, now! Forgive the man."

Mrs. Casey—"I could forgive him better if I could just see him."

Relieve That Lazy, Worn Out, Half Dead Look Don't Wait Another Minute

You can do wonders with your appearance. Bright eyes, cheery smile, clear complexion, snappy steps, all indicate vigorous men and women.

Your trouble may be Constipation—poisons from waste matter in the intestines circulate in the blood through your system.

Sick Headache, Bloating, Indigestion, Drowsiness, Poor Appetite and all other complexions generally follow.

CARTER'S LITTLE LIVER PILLS is a Vegetable laxative, moves the bowels gently, no pain, and do not contain Calomel, Mercury or habit forming drugs.

CARTER'S LITTLE LIVER PILLS are small, easy to swallow and if taken daily as a regular will promote good health.

Try them tonight—to-morrow refreshed. 25c. and 75c. red pkgs.

W. N. C. 1670

Gives Concert From Airplane

Singer in Machine 4,000 Feet Up Uses New Device

In flight approximately 4,000 feet above the street, John Charles Thomas, concert baritone, sang operatic arias to an audience in Columbus Circle, New York, in the first official test of the "Voice of the Sky," a secret sound-producing and amplifying device which makes possible direct vocal communication between aircraft and any one on the ground.

Mr. Thomas sat singly in a cabin of the plane, singing and talking into this newly perfected amplifier of the Plane Speaker Corporation of Philadelphia, while his audience stood shivering in the fright blast below.

Despite the fact that the plane was bucking of a 40-mile breeze, and despite the din of street traffic, the melodies were heard distinctly by the crowds on the sidewalks.

"Hello, New York," came down from the sky in stentorian tones. Then to further demonstrate the amplifier, Mr. Thomas while circling about, addressed his ground audience briefly.

Leaders in the aircraft industry witnessed the demonstration. Major General John F. O'Ryan, president of the Colonial Air Transport Company of New York, one of whose planes was used in the test, said he believed the "Voice of the Sky" would be of great value in commercial aviation.

"With this device installed in planes on our New York-Boston route, and on the proposed New York to Chicago route," he said, "it will be possible to communicate with the towns and cities over which they pass, as 'No mail today for Sandusky,' or similar spoken messages from the air."

"CASCARETS" FOR COSTIVE BOWELS, HEADACHE, COLDS

To-night! Clean your bowels and stop headache, colds, sour stomach

Get a 16-cent box now. Turn the wheels out—the headache, biliousness, indigestion, the sick, sour stomach, and bad colds—turn them out tonight and keep them out with Cascarets.

Millions of men and women take a Cascaret now and then and never know the misery caused by a lazy liver, clogged bowels, or an upset stomach.

Don't put in another day of distress. Let Cascarets cleanse your stomach; remove the sour, fermenting food; take the excess bile from your liver and carry out all the constipated waste matter and poison in the bowels. Then you will feel great.

A Cascaret tonight straightens you out by morning. They work while you sleep. A 16-cent box from any drug store means a clear head, good stomach and clean healthy liver and bowel action for months. Children love Cascarets because they never gripe or sicken.

Old Locomotive in Museum

One of the world's oldest locomotives, long famous in England as the Hutton Colliery locomotive, has come to rest at last in a railway museum in York after a triumphant tour of exhibitions. This veteran, in many respects resembling the world's first passenger engine, Locomotive No. 1, was built in 1825, rebuilt in 1857, and again in 1882.

Dread of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. H. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are ward off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

B.C. Depending on Prairies

Their Development Means Greater Advancement for Coast Province

British Columbia is greatly concerned in the peopling and development of the prairie provinces, according to General A. D. McRae, M.P., for North Vancouver.

"In the progress of the prairie provinces," Gen. McRae said, "lies our own great chance to go ahead. We are fully aware of the importance of obtaining Alberta's wheat for shipment through the port of Vancouver."

He thought the time was not far distant when prairie cattle would find their way as fresh meat via the Panama Canal to the British market. Both fruit and meat would soon be shipped by this route, he said, as the result of the introduction of a new and efficient cooling system on Pacific transports.

"I realize the gravity of the situation," said Sir Isaac Newton as the falling apple hit him on the head.

Minard's—the dependable flintment.

SUNDAY SCHOOL LESSON

MARCH 6

SHARING THE GOOD NEWS

Golden Text: Ye shall be My witnesses. Acts 1:8.

Lesson: Acts 8:1-8; 2 Corinthians 5:11-20.

Devotional Reading: Isaiah 55:1-7.

Explanations and Comments

1. Sharing the Good News in Samaria, Acts 8:1-8.—Persecution followed the martyrdom of Stephen, and the disciples were forced to flee from Jerusalem—they were scattered abroad. They did not think that the responsibility of witnessing for Christ rested upon the leaders alone, and the entire rank and file went about preaching the word.

Philip, one of "The Seven," who became known as Philip the Evangelist because of the success of his ministry (Acts 21:8), went down to the city of Samaria. The Jews had no dealings with the Samaritans, but their Lord's last command (Acts 1:8) bade them witness for him in Samaria. To overcome their prejudice against the Samaritans, the followers of Jesus needed only to go to Samaria and preach to them.

If you are prejudiced against any one, do him a good deed.

The Samaritans, like the Jews, were looking for the Christ; Philip made known to them the fact that he had already come. Philip probably little realized the greatness of the movement he was inaugurating when he went down to the city of Samaria and proclaimed unto them the Christ. He found the fields white unto harvest; the people accepted his word; (baptisms concerning the Kingdom of God were baptized. There was great joy among them when many with unclean spirits, the palsied and the lame, were healed.

"It follows as the night the day that a church with a real personal contact with God cannot keep still about it."

The Bolero Dress is Smart

This bolero dress is decidedly smart, yet quite easily fashioned. The skirt has inverted pleats in the front and is joined to a front bodice, while the back is in one piece. A bolero is attached at the side seams and falls in graceful folds in front, and the long sleeves are gathered to wristbands. A wide girdle fastens with a buckle in front. Contrasting material is effectively used for the shaped collar and bodice front over which the bolero opens. No. 1475 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 3 1/2 yards 39-inch material, or 2 1/2 yards 54-inch, and 3/4 yard 36-inch contrasting. Price 20 cents the pattern.

The garments illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments depending for taste, simplicity and economy will find her desires fulfilled in our patterns. Price of the book 10 cents the copy.

How To Order Patterns

Address—Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg.

To remove old wallpaper, stir a quart of flour paste into a pail of hot water, then apply this mixture to walls. Being thick, it will not dry quickly, but will saturate the paper, which may then be easily scraped or peeled off.

Announcement to RED ROSE TEA Enthusiasts

CENTURIES ago, when tea was first introduced to the English Nobility, the precious leaves—then almost priceless—were packed in sealed lead containers.

For many generations lead continued to be used as a protective package for all fine quality teas. Then the modern metal, Aluminum, was introduced. But during war-time and later, paper bags and paper boxes were largely used and have held sway ever since.

In our 30 years experience putting up Red Rose Tea we have used all these containers and each has some particular merit.

But careful tests over a long period prove that Aluminum is by far the best container that has yet been found, and paper packages of every kind the poorest. When in contact with dampness paper absorbs moisture which soon affects the quality of the tea, and in some instances completely spoils it.

Having found the paper package unreliable and uncertain, we have again adopted the Aluminum package which we used years ago. For we know now that Aluminum can be better depended upon than any other.

Unlike paper, Aluminum does not absorb moisture. It preserves all the original flavor and strength. So now and in the future Red Rose Tea will be packed in the Aluminum package, as it was in years gone by.

Airplanes Will Be Used

To Convey Representatives to Imperial Mining Conference Into Manitoba Area

Representatives of leading mining operators in the British Empire and United States will be taken into the Central Manitoba mining area by airplane when the Empire Mining conference visits Winnipeg next September, if present plans materialize. A local committee, including representatives from all organizations interested in mining, is working to get the necessary planes from the Ontario and Dominion Governments.

The Mining and Metallurgical Congress will meet in Montreal next August, and in the six weeks following, delegates will visit mining fields throughout the Dominion. Members of the ten institutions that compose the congress reside in 79 countries and already 500 reservations have been made by delegates from 15 countries.

M. E. Prof. (after lecture): "Are there any questions?"

Prosh: "Yes, sir, how do you calculate the horse power in a donkey engine?"

The eyelids of a frog wink upward.

Cold Relieved or Money Back

Everywhere men, women and children are finding instant relief from Coughs and Colds of all kinds by taking Buckley's Mixture. Everywhere druggists are selling "Buckley's" under positive guarantee. The first dose proves how different it is—and there are 40 doses in a 75-cent bottle! Never be without this proven conqueror of colds.

W. K. Buckley, Limited, 142 Mutual St., Toronto 2

BUCKLEY'S Mixture. Act like a flash—a single sip proves it.

Establishes Home for Blind

Former Jewish Immigrant Afflicted Himself Aids Fellow Sufferers

Shedlet Neeshman, stricken blind while travelling to America as an immigrant 23 years ago, is awaiting the opening on April 1 of the Home of the American Jewish Association for the Blind,—his contribution to sightless people of his race.

After being detained at Ellis Island until his father posted a bond against the possibility of his becoming a public charge, Neeshman began selling papers at the age of 15. With the money saved from newspaper peddling he founded a printing company in 1912. Eleven years later he began planning construction of the home.

His stay while a boy at the Industrial Home for the Blind in Brooklyn, where he would not eat food prepared there, prompted the idea of an orthodox Jewish institution for the sightless.

Expect Cheaper Cars

Canadians are to purchase their motor cars a little cheaper as a result of the 20 per cent. reduction on sales tax rates in the Federal budget. It was computed in automobile circles that following the tax reductions the retail price of the majority of cars will shortly be reduced from about \$5 to \$15, or approximately the cost of the automobile license. The sales tax on motor cars is charged on the actual cost to the local dealer, or the duty paid value plus freight and excise tax.

Warden—It is our custom to let a prisoner work at the same trade here as he did outside.

Prisoner—Yes, sir, I was a travelling salesman.

Minard's Liniment for rheumatism.

Eclipse of the Moon

Five Eclipses of the Moon and Sun Will be Seen This Year

Two eclipses of the moon and three of the sun, as well as the return of the astronomical events slated for 1927, says Popular Mechanics Magazine. Of the eclipses, only one will attract much attention. It occurs on June 29 and will be visible in England early in the morning, the first eclipse seen there for two centuries. June 15, an eclipse of the moon will be witnessed throughout the United States and Canada at 3:13 a.m., eastern standard time; the moon will be completely hidden by the shadow of the earth. The other eclipse of the moon takes place in December, but will not be visible here.

SO SHORT OF BREATH SHE COULD HARDLY DO HER HOUSEWORK

Mrs. Nelson Moore, Milford, Ont., writes:—"I had heart and nerve trouble, and became so short of breath I could hardly do my housework, and was so nervous every little round I heard felt like a shock to me. A friend of mine recommended

so highly I got a box of them and they did me so much good I got the second box, and now I am feeling like a different woman."

Heart and Nerve Pills are 50c. a box at all druggists or dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Russia Sends Stock Argument In Reply To The British Note

Moscow.—"Fulfilling the desire for peace of the laboring masses of the Soviet Union, and in full coordination with the wishes of the British masses, the Soviet Government will continue its policy of peace, excluding any aggressive spirit toward any other countries, and will sincerely welcome any mutual step toward peace on the part of Great Britain."

A tone of conciliation and moderation, but firmness, permeates the note, which declares:

"The Soviet Government confirms M. Krassin's assurance to Great Britain of the desirability of removing all existing difficulties and causes of mutual complaint, and the necessity of restoring normal relations between the two countries."

M. Litvinoff matches almost line for line the anti-British epithets used by Soviet emissaries and news papers, as quoted by Sir Austen Chamberlain's note, with similar uncompromising expressions against the Soviet by Winston Churchill, Lord Bickenhead, L. C. M. Amery and other British ministers.

Complaint is made that the British Government has failed to adduce any concrete evidence of the violation of existing agreements by the Soviet, contenting itself "with a single accusation based on the false Zinoviev letter, the authors of which were unpunished."

Declaring no agreement exists limiting the liberty of the press or speech within the boundaries of either country, M. Litvinoff argues the impossibility of regarding as anti-British propaganda either the Soviet analysis of the British policy in the Soviet Union and foreign countries, or Soviet discussions respecting the certainty of a world revolution.

The note alludes to Sir Austen Chamberlain's threat to annul the trade agreement or sever diplomatic relations if Great Britain's latest demands are not complied with, and declares "Russia will tighten nobody in the Soviet Union, and concludes:

"If the British Government thinks such antagonism is demanded by the interests of the British people and general peace, the British Government must assume full responsibility for the ensuing consequences."

Ambassadors Deny Rumors

England Has Not Given Italy Free Hand Against Turkey

Constantinople.—Rumors that England had granted Italy a free hand against Turkey as compensation for Italian cooperation in China so aggravated public opinion here that the Italian and British ambassadors today issued public denials.

Deputy Mahmud Bey, chief spokesman for President Mustafa Kemal Pasha, scouted the idea of Italian aggression, but stresses the fact that the reinforced Turkish army is prepared for any eventuality.

Ask Accord on War Debts

Paris.—France is asking Great Britain and the United States for provisional accords on the war debts. Premier Daladier told the Chamber of Deputies, the accords, he added, would not be submitted to Parliament for ratification, the government alone being responsible.

May Precede by Easter

Ottawa.—Prorogation of Parliament by Easter is now forecast in Parliamentary circles. The rumor is that prorogation may take place about Thursday, April 11.

Monroe Doctrine Will Not Be Affected By Visit Of British Cruiser

London.—The order issued by the British Government for the light cruiser Colombo to proceed to Nicaragua has attracted but slight attention from the average Britisher, while the press and officials say the despatch of the vessel offers no infraction of the Monroe Doctrine. The British Foreign Office holds that the present order to the Colombo does not affect the Monroe Doctrine, and that the Colombo is going to Nicaragua merely as a refuge for British mariners. The Colombo was said to be instructed to stand off Bluefields, without sending a landing party ashore,

Millions for Wheat Growers

Important Future for Garnet Wheat Predicted by Dominion Cerealist

Ottawa.—A gain of millions of dollars to Western wheat growers with the extension of the wheat line further north than ever before, the possible cultivation of millions of acres in certain districts through the discovery of Garnet wheat, is forecast in a bulletin on Garnet wheat which has just been issued by L. H. Newman, chief Dominion cerealist at the Central Experimental Farm here.

Garnet wheat which is a hard, red spring wheat like the famous Marquis wheat, is a discovery of the Central Experimental Farm and the bulletin has been issued so that the wheat growers may know how this new wheat is to be raised.

The summary is based upon the behavior of Garnet with other varieties of wheat on western experimental farms, and shows that the new wheat will ripen from five to 10 days earlier than even Marquis wheat. This means that the area on which wheat may be grown will be extended very much further North than ever before.

Time Limit for Tourists

Automobiles Entering Canada From South May Now Stay for Sixty Days

Ottawa.—Permits for automobiles driven by tourists entering Canada have been extended from thirty to sixty days, according to an announcement by Hon. W. D. Egan, minister of customs and excise.

In the past, American tourists entering Canada have been permitted to drive their cars in this country for thirty days without payment of fees. This period has now been extended to sixty days with the option of an extension to ninety days under certain restrictions.

It is understood that tourists wishing to remain the full limit of time will be required to present identification and credentials from authorized motor clubs or similar organizations. For some years past provincial governments, Canadian automobile clubs and organizations interested in the tourist traffic generally have been seeking to have the thirty-day restriction widened.

Will Settle Legality of General Strikes

Job for Government Not Judge, Says Earl Birkenhead

Liverpool.—The broad intentions of the Government's legislation to be introduced restricting the privileges of trade unions were indicated by Earl Birkenhead, secretary for India, in the course of his address here. "We do not think it proper to leave the legality or illegality of a general strike to depend upon the expression of opinion of a judge, however distinguished he may be," he said. "We intend that it should be laid down by the authority of that parliament which was challenged, that now and hereafter that weapon is forbidden, and has become criminal."

Mail Planes Burned

Kansas City, Mo.—Fire destroyed a hangar at Richards Field, near here, containing four air mail planes. The planes were owned by the National Air Transport, Inc., which holds the Chicago, Dallas line contract. The damage was estimated at more than \$100,000.

To Protect Shareholders

Shareholders of Saskatchewan Co-Operative Elevator Co. to Benefit

Regina.—Shareholders of the Saskatchewan Co-Operative Elevator Company will receive \$155.78 for every 1911-12 share for which they originally paid \$7.50, if the bill providing for the winding up of the company passes the Legislature in its present form. In other words, a shareholder holding the limit of 20 of these shares will receive \$3,115.60 for them on the per capita method of distribution proposed in the bill.

Shares issued in succeeding years will be worth proportionately less, the last shares issued being worth \$27.87 under the provisions of the bill. The difference is accounted for by the fact that the shares issued in different years are paid up in varying amounts ranging from \$12.50 for the 1911-12 shares to \$7.50 for the last issue, stock bonuses accounting for the difference in the paid up value.

"Speculators" who planned to make a "clean-up" on these shares will be out of luck if the bill can prevent it. Premier Gardiner declared, making it clear that the government desired to protect not only the delegates attending the annual meeting of the Elevator Company next week, but the thousands of shareholders remaining in the country.

Twelve Battalions Under Orders

But Number of British Troops for China Is Unknown

London.—Doubt exists regarding the strength of the British forces which should be arriving in Chinese waters in the course of the next few weeks. In some quarters it is put as high as 16,000, in others as considerably under 10,000, but "Twelve Thousand Troops for China" figured on the posters. The twelve battalions which are under orders, under the command of Major-General John Duncan, will embark 350 men each, or about 4,200 in all.

In addition, there are a thousand marines and the armored car troops, as well as the naval ratings. The Indian brigade consists of two British regiments and two regiments of Punjabis. General Duncan will be independent of either of the two British military commands in China. He has been for Shanghai and his troops will follow as transports become available. They will be known as the Shanghai Defence Force.

Russian Refugees Fighting in China

Vanguard of Chang's Army Suffer Many Casualties

Shanghai.—Six thousand "white" Russians, vanguard of Chang's army, defeated forces of Wu Pei Fu in Hunan province in a battle in which the Chang forces alone suffered 2,000 casualties.

The Russians, believed to be refugees who fled to China to escape the Bolsheviks in their own country, are fighting with Chang's army in its attempt to force its way through the territory of the inactive Wu so it can attack the Cantonese forces in the south.

U.S. Miners May Strike

Washington.—While there remains the possibility that the soft coal miners and operators of the country will reach an agreement at a later conference, the break up of the Miami meeting is looked upon here as practically assuring a strike April 1.

Suggest Conference on Old Age Pensions

Matter Was Recently Brought Before Alberta Legislature

Edmonton.—Old age pensions came before the Alberta Legislature following the introduction of a motion by J. T. Shaw, Liberal leader, that the Government should introduce at the present session an old age pension bill and an amendment by A. A. McNeil-Dwyer, Conservative leader, that the question be discontinued at the present session and if thought fit, that a bill be introduced as soon as federal legislation upon this subject has been enacted by the Dominion Parliament.

Premier Brownlee adjourned the debate with a view to the bringing in of a compromise amendment on which all those opposed to the motion might agree.

Premier Brownlee thought that even if the federal House decided to adopt a principle of 100 per cent. liability for payment of old age pensions, nobody would very seriously challenge the legislation.

If a conference were held, he suggested, it might be possible in case the federal Government refused to accept 100 per cent. liability, that it would undertake seventy-five per cent. of it and he pointed out that the Ottawa House might lower the pension age to 65, which would bring Alberta's share of the burden to possibly \$600,000 a year.

Grain Shipped Cheapest Route

Western Growers Have No Preference as to Ports

Halifax, N. S.—Snow, member of the Dominion Grain Commission, and one of a delegation of Western grain men who inspected the elevator facilities at this port, states that no great movement of grain through Halifax can be anticipated pending additional terminal equipment.

Mr. Snow contended western grain growers and shippers had no preference as to ports. They were primarily interested in economy and Halifax, Saint John and Portland looked all the same to them.

Grain would follow the cheapest route and by way of illustration he pointed out that United States grain was shipped through the port of Montreal when that port offered the lowest rates available.

Addressed Large Audience

New York.—The voice of President Coolidge in eulogy on George Washington was carried by radio to countless millions throughout the world—the largest audience ever addressed by man. Mr. Coolidge's voice was broadcast throughout the country by a hook up of 42 stations and re-broadcast in Europe, London, Paris and Berlin listened in and reports were that reception was unusually clear.

Valuable Pearls Missing

London.—Scotland Yard has been busily and vainly making enquiries since February 17 on the mysterious disappearance of a necklace of great value, the value of which is set at £20,000. A jewelry firm sent the necklace to the London home of J. Bone-Fraser, noted shipowner. The package was not opened for several hours and then it was discovered the necklace was missing.

Women on B.C. Synod

Victoria.—Women will be admitted as members of the Anglican synod of British Columbia with the restriction that "in every parish at least 50 per cent. of the elected representatives shall consist of male communicants." It was decided at the annual meeting of the body here.

Thousands Of Soldiers At Shanghai Are Now Guarding Foreign Area

Commission Goes Overseas

Expansion of Western Canada's Livestock Trade Is Presaged

Montreal.—Vigorous expansion of Western Canada's livestock shipping trade is presaged in the appointment and departure for overseas of a Saskatchewan commission to investigate cooperative livestock marketing in Europe, for the benefit of livestock interests in that province.

Gratification at the announced reduction in ocean freight rates on Canadian cattle to Great Britain from \$29 to \$15 a head was expressed by Edward Evans, a member of the commission. Mr. Evans is manager of the Saskatchewan Co-Operative Livestock Yards at Moose Jaw and president of the Saskatchewan Livestock Pool.

Further efforts will be made by western livestock interests to secure an adjustment of rates on lighter cattle to a more equitable basis, he said. This is needed, he explained, if the feeder trade with Great Britain is to be developed properly.

Dr. W. W. Swanson, also a member of the commission, explained the objects of the visit to Europe. Dr. Swanson is internationally known as a political economist and is professor of economics at the University of Saskatchewan.

Livestock marketing methods will be studied in Liverpool and London and then the commission will proceed to Denmark.

It is understood the commission will visit Belgium and Germany and will also study the Irish cattle situation in England.

Young Journalists Will Attend Meeting

One Thousand Expected at New York's International Gathering

New York.—More than 1,000 lay and girl editors ranging in age from 12 to 18 years and representing school publications in 43 states, Canada, Alaska, Hawaii and the canal zone are expected to attend the third annual convention of the Columbia Scholastic Press Association here March 11 and 12. The student journalists have submitted their publications in a competition for 13 silver loving cups and certificates of honor.

Papers written and edited by kindergarten children will be entered by a feature contest. Foreign language papers, prepared by American students and trade journals will also be entered in the contest. The publications to be represented at the convention run into hundreds and are of many different types.

Western Livestock Association

Winnipeg, N. D.—J. B. Hill, Winthrop, Sask., was elected president of the Western Canada Livestock Shippers' Association at the annual meeting here. The following following directors were elected as representatives for Saskatchewan: R. B. Warner, Kennedy; J. Davidson, Carleton Place; and C. E. Carleton.

Hon. C. A. Dunning Says Liberal Tariff Policy Has Remained Unchanged

Ottawa.—Hon. C. A. Dunning, Minister of Railways, laid the tariff policy of the Government before the House. The Minister of Finance, he declared, authorized him to say the Liberal fiscal policy was unchanged.

"We shall," Mr. Dunning said, "move forward cautiously with the aid of knowledge of the facts secured by the tariff advisory board toward the goal of making our tariff structure bear as lightly as possible on production industry and the people generally, having always in view the greater prosperity of all the legitimate industries of Canada."

"The tariff must be made to serve the best interests of the Canadian people as a whole. It must be adjusted from time to time to meet the needs, not of one class or group of industry alone, but of our whole economic structure. This does not mean tariff tinkering, so-called, but does mean a continued expert examination and adjustment wherever warranted by the facts so revealed."

A suggestion by E. J. Garland, C.E.A., Bow River, that there was an

Shanghai.—Thousands of the regulars, fighting men of Great Britain, France and Italy, paced a 20 mile line of barbed wire, sand bags and machine guns to check attempted entrance into the foreign settlements of Shanghai, by warring factions in China's upheaval.

On board ship ready to move into line it needed were 2,000 United States marines and bluejackets. Washington has ordered that they be landed when necessary to protect United States lives and property and not before.

Behind the line of foreign troops, which surrounded the international settlement and French concession and reached some distance into native Shanghai, were 8,000 foreigners possessing property valued at \$16,000,000.

Foreign soldiers and marines formed the defence in response to the request of the municipal council to the consuls of foreign powers to aid in the defence of the city. Three thousand British troops took up their positions along the line. With them went marines of France and Italy.

The international settlement boundary had been freshly strengthened with barbed wire and the French had wired their entire boundary when joining the native boundary of Shanghai.

Found Guilty of Arson

Six Kiev Firemen Including Chief Will Be Executed

Kiev, Ukraine.—Severe sentences have been passed on ten firemen found guilty of arson. Six of them, including the chief, will be shot, two were sentenced to ten years' solitary confinement and the other two must serve five years in prison. The chief pleaded that the men set the fires fearing they would lose their positions because of a long period of inactivity.

The members of the fire brigade were arrested several days after they had been commended for heroism and skill in fighting fires in the Trade Union Club of Kiev, and the headquarters of a navigation company. It was charged by the police that they deliberately set the buildings alight for excitement.

Five Canadians Still at Chongtu

Chongtu, China.—The evacuation of missionaries from Sze Chwan province, virtually has been completed. Five Canadians and sixteen Americans are still at Chongtu, capital of the province, while 26 British and nine Americans are remaining in Chongtu until the evacuation becomes total. The Canadians at Chongtu are: W. J. Mortimore, T. Dickinson, R. W. Spaulding, W. Small, and E. C. Willford.

Cut Cattle Rates

Ottawa.—Word has been received here that the Reford Line and the Canadian Government Merchant Marine have cut the Atlantic rate on cattle from \$29 to \$15 per head. No information has yet been received as to a similar cut by other lines.

Practise High C's on the High Seas

Sydney H. Nicholson, organist of Westminster Abbey, conducting a rehearsal on board the Canadian Pacific steamship Montrose with the boys of the Westminster Abbey choir, now touring the Dominion in a series of song recitals. With the boys is seen Dr. A. V. Baillie, Dean of Windsor, who is accompanying the choir in his Dominion wide trip.

Commercial Air Supremacy

French Planes Are Challenge But
Teutonic Lead Is Conceded

The battle for world leadership in aviation is being fought first with engines and second with money and organizers. French machines are the finest performers in the world, holding the three world's records for speed, altitude and distance in a straight line without descent, but Germany is building the best commercial planes. The German foundation for a commercial aviation industry has been so well laid that she is now advanced by the French to be the greatest commercial air power in the world, and seems destined within the next few years to establish herself firmly in that position unless something happens to overturn the probability.

These are a few of the conclusions gained from observing the exhibits in the tenth Paris Aviation Salon and from consulting the comments of experts. There seems little doubt but that this Salon will go down in French aviation history as marking the end of one phase in French plane building and the beginning of a new. From now on less attention is to be paid toward the development of fast military planes and more to the building of passenger and freight carriers. It appears that the history of the automobile is to be repeated. The high-speed, hard-built, expensively performing machine built like a Swiss watch, but which obtains those qualities at the expense of complication and high cost, is to give way before the more rugged, safer and more economical machine. Germany has forced the change.

Competing for Passenger Trade

Germany Starts Construction of Two
Large Ocean Liners

Ever since war the largest and fastest ships of Germany's former merchant fleet have been plying in the transatlantic service of her competitor nations. With smaller, slower ships, Germany had succeeded in recovering a substantial passenger business. Part of it has been in passages between the United States and England, but Germany is handicapped in full transatlantic competition by the lack of ships of the class of the *Leviathan*, the *Majestic*, and the *Imperator*.

The announcement that the North German Lloyd has begun the construction of two 16,000-ton liners accounts to Germany's notice that she hopes to regain her former important position in the passenger service. The displacement of the German-built *Leviathan* is 22,000 tons. That of the *Imperator* is 20,000. The Bremen and the Europa will not be completed for perhaps two years, but when they are ready they will have the advantage of developments in steam-turbine efficiency which will give them a speed of 26 knots an hour. That will compare with the *Leviathan's* speed of 27.07 knots an hour for a trial trip of twenty-five hours and with the *Imperator's* transatlantic record of an average of 26.25 knots an hour.

The Miles We Carry

All Wearing Apparel Contains Surprising Length of Thread

Statistics show that every inch of cloth contains about twenty-five threads running downwards and the same number running across it, so that a square yard is composed of 1,800 threads, each a yard in length.

The average suit or costume needs four square yards of cloth, so that every man or woman wears something like four miles of wool.

Allowing two sets of clothes a year we find that each of us uses 400 miles of wool in fifty years.

When we come to linen or cotton goods, with eighty or 100 threads each way to the inch, the total length of thread becomes appalling. A single handkerchief may contain 2,400 strands each 15 inches long, so that 1,000 yards of cotton thread are required to make it.

A shirt represents about three miles of thread.

The Royal Ranch

Professor W. L. Carlyle, manager of the Prince of Wales ranch, near High River, is en route to England where he will consult his royal employer regarding business matters pertaining to the ranch, purchase new stock, arrange for the usual year by year extension of the Prince's commercial activities in Alberta.

Roses are grown in China for purposes other than ornamental. They are used to flavor confectionery and home-made wine and perfume tea leaves.

Advice for Motor Drivers

Extreme Caution Is First Law of
Common Sense

Keep your foot in the clutch despite what experts tell you to the contrary. If the traffic is great, keep your foot on the clutch. Don't take unnecessary chances on the highway or in the street; glide over the bumps, thus saving your machinery; and don't forget your brake. Caution is the first law of good sense, when it has to do with 40-horse-power. Approaching an intersection, remember clutch and brake.

Years make daring drivers. They go rapidly and easily, with fearless abandon and nonchalance. But they have an undue share of accidents because they don't think enough of clutch and brake. Oh, yes, there are disasters through confusion, and through timidity; but they are not the disasters of the young driver. Ninety-nine of the wrecks come from going too fast.

A good driver will keep control of his machine at all times. He can stop quickly but without a shock. He can go slow, as he must when others might be endangered by his fast driving, but can step on the gas and leap ahead when he sees his opportunity. The person who controls his power all the time is the one who has the opportunities, which in the heavy traffic of life are fleeting and momentary. The man who has learned is the one who knows, and the one who knows is the one who has opportunities. When one is in no position to take advantage it is not an opportunity for him. Therefore the discipline of the mental power is the putting of hand and foot on the various controls of life.

Many lives are wrecked by even a momentary loss of control. It is quite the custom to blame some other driver. It is possible for an automobile to be wrecked by the carelessness of some other man than the one driving it; and for a life to be ruined by the fault of another; but it is exceedingly rare. When such a calamity occurs it is to one who has lost control of his machine, if but for a moment.

Keep your foot on the clutch!

Preferred to Lose Case

Street Trader Summoned for Selling
Bad Figs Refused to Eat One

When the Marquis of Reading was first called to the bar as plain Mr. Rufus Isaacs, he was retained to defend a man, a street trader, who had been summoned for selling bad figs.

Mr. Isaacs dwelt at length on the splendid quality of the fruit, and in this he was, as was only natural, backed up by his client.

Presently the magistrate intervened. "Has either of you tasted the fruit?" he asked.

They both confessed that they had not. Whereupon the magistrate suggested that either the defendant or his counsel should eat some in court.

Mr. Isaacs turned to his client: "Go on," he whispered, "eat one or two."

"What will happen if I don't?"

"You'll lose the case."

"All right," answered the defendant resignedly, "then I'd rather lose it."

French Making Unique Map

Covers Several Acres at Boy's School
Near Paris

A map of the world, covering several acres with real water for rivers and seas, miniature railroads and smoking volcanoes, is being laid out at a boy's school for Americans twenty miles west of Paris along the Seine. The cost is estimated at 1,500,000 francs.

This visualization of geography is intended to make study a pleasure, and it is on a par with other features of the institution, housed in a chateau built for one of Napoleon's paymasters.

The continents are laid out in concrete with the topography indicated. The seas are deep enough for the pupils to ride by boat from one port to another. The railroad trains are drawn by steam engines.

An old chapel is being transformed into a little theatre.

A Game for Two

"Dear Clara," wrote the young man, "pardon me, but I am getting so forgetful. I proposed to you last night, but really forget whether you said yes or no."

"Dear Will," she replied, "so glad you wrote. I know I said yes to some one last night, but I had forgotten just who it was."

The average life of an inhabitant of the United States is said to have increased 15 years in the past 50 years.

The service of a summons by radio has been declared legal by a New York court.

Calendar Reform

Movement Still Under Way to In-
augurate 28-Day Month

Determined efforts to bring about a reform of the calendar with a 28-day month have been taken with the view of definite action at Geneva in August.

In 16 capitals of northern Europe steps already have been taken to show the advantages of the fixed calendar idea. There are opponents of the plan but no organized effort has yet appeared.

Under the proposed plan of reform all months would have 28 days, the first day of the month always falling on Sunday and the last on Saturday. If the year remained the same length an extra month would be introduced, leaving one day over and two in leap year.

Could Expect Nothing Else

Gold Cup Given as Prize by Kaiser
Was Only Gift

With the affairs of the ex-Kaiser so much in evidence and his meanness so emphasized by the German author of the latest book about him, the following fact vouches for by Lady Grove, in her "Memoirs of Four Continents," is another illustration of this characteristic. Among the well-known yachtsmen with whom Lady Grove sailed at Cowes was Mr. Cecil Whitaker.

"He had won the German emperor's gold cup at Cowes. It was supposed to be worth \$2,500, but I was told that when it was valued later it was discovered to be only gilt, and not worth more than \$250."

It is unlawful for a woman to set foot on Athos Peninsula, in Greece, where monks of the Greek church live.

Bacon fat is preferable to lard for shortening cornbread or muffins.

An Old French Superstition

Belief Held During Middle Ages That
English Were Tailed Race

It was in the month of January, 1558, that the English lost Calais, the name of which Queen Mary said would be found upon her heart. The capture by the French was due both to the ineptitude of the garrison and the might of "Le General Janvier," for the attacking troops were able to advance across ice formed on the dykes and sluices, which were relied upon as a defence.

A curious fact is associated with the English withdrawal from France; the natives feared at them as "the tailed English." It appears to have been a belief, genuinely held during the Middle Ages by the enemies of England, that her people had at least the vestige of a tail. As late as the christening of James, who was to become king of the two realms, this superstition was remembered well enough to be a touchy topic.

It is said that great offence was given to some English lords who were at the ceremony, by a company of mummeters, who, as they passed the place where the Sothebys were sitting, pretended that they had tails and made the motion of wagging them.

Where Living Costs Are Highest

An average family's daily basket of provisions, including meat, vegetables, bread, rice, milk and butter, was the basis of an inquiry by the League of Nations' Labor Office into the cost of living in the chief cities of the world. Lodz (Poland) was found to be the cheapest, with 2- per day. Philadelphia was dearest with 9-1, and Sydney next with 8-1. London, with 7-1 is eighth on the list.

There is at present a world shortage in tin, caused by the demand for its use in the manufacture of widely varied articles, including loud speakers and silk hosiery.

TRAVEL BROADENS EDUCATION

The outlook of the average man is usually as broad as the world in which he lives. This being so, it is not surprising that more people are taking advantage of the summer months each year to travel as widely as their means will permit and to write this expenditure off against the two worthy items "happiness" and "education."

In response to demands the Canadian National Railways organized a personally conducted tour from Western Canada to Europe last summer and this proved to be so successful that they have completed arrangements in connection with the Canadian Line, for a second annual tour this summer. From Montreal this tour is an optional one of thirty-seven days or fifty-one days. Both tours will take the traveller through Scotland, England, Belgium, France and Switzerland. The longer tour will continue on into Italy and the principality of Monaco, the capital of which is Monte Carlo, and also to Nice and the Riviera.

Those making both tours will sail together from Montreal on the S.S. "Anania," on July 8th, and will disembark at Glasgow on July 16th. From there they will continue together to Edinburgh and through the Trossachs, then south to Leamington, Warwick, Stratford-on-Avon, and on to Oxford and London. Three

full days will be spent in and around London before the party leaves for Bruges and Brussels. From Brussels they will continue to Lucerne. Here the parties will divide.

Those taking the shorter tour will move from Lucerne to Interlaken and thence to Montreux and the Lake of Geneva. From there they continue to Paris where two days will be spent in and around the city and one day given over to a trip to the battlefields. They will leave Paris on Saturday, August 15th for Cherbourg, where they will board the S.S. "Ascania" for Quebec and Montreal, where they will be due to arrive on August 14th.

After leaving the shorter tour party at Lucerne the second party will proceed to Interlaken and from there to Venice, Florence, Rome, Genoa, Nice, Monte Carlo and Avignon, after which they will go to Paris. Three full days will be spent in and around Paris and there will be two excursions to the battlefield area. The party will sail from Cherbourg on August 20th on the S.S. "Anania," and will arrive at Quebec and Montreal eight days later.

The photographs show some of the places of interest which will be visited on these tours: (1) Hyde Park Corner, London; (2) Grand Staircase, The Paris Opera House; (3) Grand Canal, Venice; (4) Tower Magdalen College, Oxford.

The Value of Education

By Means of Education Crime Is
Perceptibly Decreasing

Total disregard for the rights of others is the chief cause of crime. One man sees another with a roll of bills. Should he be stronger, or, more probably, armed with a gun or black-jack, he uses this advantage to enforce his will.

Entirely disregarding the other man's right to the money, he takes possession, all too often with the additional crime of assault.

To send the assailant to penitentiary removes him from the opportunity to do that kind of work, but changes in character effected are rather infrequent.

Most criminals remain criminals after they emerge from behind penitentiary bars.

So long as there are criminals abroad there is a grim necessity for prisons, although they do little more than suspend the activities of the particular scoundrel for the term of his imprisonment.

The little more they do consists largely of putting the fear of the law into the hearts of the others.

But the fact that every year produces its crop of murderers and burglars and pickpockets, as well as thieves and defrauders shows that too little is known about making them better.

Progress, however, is being made. Perusal of history shows that the world is by no means as bad as formerly.

It is seldom today that bandits get into power and conduct nations as they have been recorded as doing.

Generally speaking, the lives and property of decent people are more respected than they once were.

Education is doing that.

Gradually it is instilling into the human mind the ancient truth that honesty is the best policy.

The study of psychology is still in its infancy and it can be depended upon to do much in the future.

Every time transactions are conducted with persons of known shady business reputation, an incentive is given for them to continue such practices and this makes it increasingly difficult for established and reputable business concerns to maintain themselves in business.

Every encouragement given the undesirable trader is a blow at established business and an assistance to his unfair opponent to carry on his shady tactics.—Canadian Finance.

A Parliamentary "Whip"

Each Party Has Four Who Round
Up Members When Necessary

The expression was originally derived from the "whippers-in" of a hunt—men whose job is to whip up lagging hounds and so to keep the pack together and obedient to orders. In Parliament each of the great parties has its whips, generally four in number, members especially appointed by the leader to "whip in" their fellow members of the party.

When a vote is to be taken, the whips will make every effort to secure the attendance of all supporters of their side, even arranging the pairing off of opposite-party men should anyone find absence absolutely necessary. The word "whip" is also given to the notices sent out by them, the request for attendance being traditionally underlined in accordance with the urgency of the vote, as many as four under-ings having on occasion been used.

No Fee Cooling

A Scot consulted a Harley Street doctor, who instantly diagnosed the trouble. He said in effect: "Well, you must knock it off altogether. You understand? You must become a teetotaler and leave the drink alone." The Scot, ill pleased, was going to the door, when the medical aid said, "By the way, the fee for my advice is two guineas."

"That's all right," said the Scot, "I'm not taking your advice."

Alberta Livestock Export

Exports of livestock from Alberta for the year 1926 show a considerable increase over the year 1925, according to figures announced by the Provincial Department of Agriculture. In 1926 a total of 19,800 horses and 263,400 head of cattle were exported, compared with 15,100 horses and 240,000 head of cattle exported in 1925. The shipments went to other provinces, the United States and Great Britain.

The nickname "Quaker" was originally applied to the Friends by Justice Bennett, a Derby, England, magistrate in derision of George Fox, the founder, because he admonished the magistrate to "quack" at the name of the Lord.

Lightning wanders round and round, says a scientist. But it gets there just the same.

Management Of Bees In Spring

Expert Advice Is Given by Dominion
Aplarist

Following are some pointers given by Mr. C. O. Gooderham, Dominion Aplarist, in Bulletin No. 74 of the Dominion Department of Agriculture.

Cellar-wintered bees should not be moved before pollen and nectar are available. The right time is when the first willows show pollen or when outdoor wintered bees start bringing in new supplies. Shelter from cold winds is desirable.

Remove either in the evenings or early in the morning or on a dull day. Close the entrances when moving bees from cellar and when the filling is removed reduce the entrance to two inches.

Colonies may be examined on a warm day when the bees are flying freely. To those having less than fifteen or twenty pounds of stores, feed sugar syrup or comb of honey saved from the previous year.

Don't equalize stores unless the apiary is free from disease and never feed honey from an unknown source. A good beekeeper seldom has to do any feeding in spring, sufficient having been done in the fall.

Unto colonies that are queenless or have drone-producing queens to colonies having fertile queens.

Replace falling queens at once. Weak queen-right colonies may be saved by placing them over strong colonies with a queen-excluder between for a few weeks, or may be strengthened by adding package bees.

Defer first examination until after a few days of favorable weather conditions and nectar is coming in freely.

Outdoor-wintered bees can be examined while still in their cases.

Bees need large quantities of water in the spring. To prevent them having to go long distances for it supply the water in some sheltered spot in the apiary.

At the second examination, which will not be necessary for 2 or 3 weeks if the weather does not warm up rapidly and new nectar and pollen are not abundant, watch for brood diseases.

People Editors Appreciate

Those Who Voluntarily Will Give
News for Publication

The duty of the average man to his newspaper is thus defined by the Walkerton Herald and Times: "Many good items of news are lost to the newspapers by the modesty of the people who hesitate to tell the reporters of matters concerning themselves. Not that they do not want their names to appear in print, but they are afraid they will be pushing themselves forward. This is the wrong idea. From the reporter's viewpoint, the man who will stop a newspaper contributor on the street and inform him that he has been away to some other city, that he is going to get married, or his wife entertained friends or presented him with twins, is the best man alive. May his likeness increase throughout the earth. If you have done anything mean or disreputable, it isn't necessary to tell it, for there are always plenty of people who will do that for you. It is the good things about yourself and your neighborhood that the newspaperman wants you to give him."

Churchill is Amateur Artist

Chancellor of Exchequer Turns to
Brush for Recreation

When Winston Churchill wants to forget budgets and everything else connected with his job as Chancellor of the Exchequer, he picks up a brush and palette and begins to paint. To ease his mind of affairs of state an President, Woodrow Wilson used to read detective stories right after night in the White House, and Mr. Churchill tried this, but the system did not work. So he went back to his paint brush as an aid to ease his mind when troubled by figures and finance. Mr. Churchill studied art as a boy, and his friends declare he could have easily become a painter of the first rank had he been able to shake off the family tradition of public life. The Chancellor's idea of an ideal holiday is to skip off to Egypt and spend a week or two painting the pyramids.

New Idea for Churches

At the Simpson Methodist Episcopal Church in Minneapolis huge awning doors have been placed under the high pulpit. On these doors in large letters, appear the words "Holy Bible." As the Rev. Roy L. Smith delivers his sermon, the doors swing open and the Biblical characters as mentioned in the address emerge, impersonated by actors in full costume.—The Outlook.

The average man meets temptation about three-fourths of the way.

News Notes

Approximately 200 tons of alfalfa from the Lethbridge district has been ordered by the British government for shipment to China. The hay is being supplied by the Southern Alberta Co-operative Association.

Three wells to test out the new Milk River structure for gas and oil, will be sunk this summer, as part of large operations planned by the Canadian Western Natural Gas Co. and the Union Oil Co. of California.

The new million dollar hotel built by the Great Northern Railway in Waterton National Park, near Cardston, will be opened this season. It is to be known as the Prince of Wales Hotel.

A group of 45 Taber players presented the light opera, "Miss Cherry Blossom", in the Opera House on Wednesday before a large and well pleased audience. The production was lavishly costumed, which with good lighting effects, made a very pretty showing. The troupe carried their own scenery, — a great relief after seeing the ancient Noahs-ark fixtures which have ennobled the local stage for the past 20 years or so. Much of the singing was heightened by an orchestra of no mean size. The production was the best, by far, that Taber has given us the pleasure of seeing.
